

DAY 6

RECOVERY DAY

Cardio

Eat

Vision

CARDIO

Incline TreadMill: 45min - 1hour

Reason of Cardio

You need to do cardio even if it's just a light workout session, it's great for you. Cardio is important during your recovery days because it increases blood flow throughout your body which helps muscle damage heal quicker. This helps the body build muscle back up quicker and helps push out waste and lactic acid.

Below is an example of a meal plan. Each Client varies. Each client's body vaies. For custom food plans contact brugmethod@gmail.com to fit your needs. Thank you.

Meal One (8:00 - 9:00)
